

Real Trump Token

WHITEPAPER

From the Desk of the Real Trump Token Team

Real Trump Token (RTT) is a project that not only rewards its holders but also helps raise funds for the 2024 re-election of President Donald J. Trump. The RTT team has created the RTT ecosystem. RTT will operate on the Binance Smart Chain (BEP20). The initial supply of the token will be 10,000,000,000 tokens. The team has allocated 10% of the total supply (1,000,000,000 tokens) to the developers. Throughout the project, the team will burn at least 1,000,000,000 tokens. Token burns will occur on a quarterly basis and at surprise milestones. Members of the team will begin doxing during the presale time and the contract will undergo at least two external audits.

RTT will have a Private Presale in early June 2021 with a Public Presale soon afterwards. The Private Presale will be available to early investors with a maximum of 100 BNB raised. The Private Presale tokens will be locked on DX Locker and manually distributed at the end of the lockup period. The funds raised will be used for initial startup expenses. Private Presale buyers will have their tokens locked for a period of 60 hours after the Public Presale concludes. The Public Presale will have a soft cap of 150 BNB and a hard cap of 300 BNB, with those proceeds going into the locked liquidity pool. At the conclusion of the Public Presale, the liquidity pool will be locked and the contract ownership will be renounced.

Real Trump Token

Starting in Q2 2021, the team will officially release RTT. The basic function of the token is that every transaction will have a 10% tax. The breakdown of the tax will be as follows:

- 2% of every transaction will be redistributed to holders of RTT.
- 3% of every transaction will be locked in the liquidity pool.
- 5% of every transaction will be put into the utility wallet. 1% of this will be added to a locked “re-election” wallet on a monthly basis and will be locked until 2023. These funds will be released and used for the re-election efforts of President Donald J. Trump; in the event that he does not run for re-election, or is not elected in the Primary, the re-election wallet will go toward causes supported by President Donald J. Trump. The remaining 4% in the utility wallet will be used for future developments, operations, marketing, token burns, and future airdrops.

In Q3 2021, the team will be focusing on several projects. First, they will list the token on both CoinMarketCap.com and CoinGecko.com. Additionally, the team will pursue listings on other popular crypto exchanges. Moving forward, the team will begin hosting weekly contests for NFT artwork submissions. During each contest, members of the community will submit their artwork for the team to use on merchandise in the upcoming RTT NFT marketplace. Winners of the contests will be rewarded in RTT.

Real Trump Token

Wrapping up Q3, the team will deploy the merchandise store. The merchandise store will feature top rated items to purchase which can also be customized with future NFT marketplace products. The team plans to implement RTT functionality to enable use of tokens for the purchase of items in the merchandise store. Every transaction will distribute a percentage in RTT back to the holders. For the duration of this project, the team will surprise the community with airdrops, manual token burns, and various other promotions.

Starting in Q4, the team will expand the NFT marketplace, allowing creators to list their artwork for sale on customizable items. A percentage of every sale will be redistributed to holders. Creators whose artwork is chosen for the merchandise store will receive a percentage of the transaction. Finishing out Q4, the team will continue surprising holders with promotions while applying for the top 50 exchanges.

Beginning Q1 2022, the team will be increasing marketing efforts to attract new supporters and will begin the development of a mobile app. The mobile app will allow RTT/BNB swapping and also allow purchasing from the NFT marketplace.

As the team continues to deliver unique products and user experiences, they will also be actively monitoring President Donald J. Trump for his official announcement for re-election. Throughout the project, the team will host AMAs, hang out with holders on social media, and give back in various ways to their supporters. The team aims to drain the Crypto Swamp and give RTT holders a great opportunity to be part of a very exciting project!

Sincerely,

The Real Trump Token Team
